Art Unit: 3663

1) Applicant's election of the invention defined by claims 13-27 without traverse (paper no. 7 received May 19, 2003) has been made of record. Applicant's cancellation of non-elected claims 1-12 is noted.

2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13, 14, 18, 19 and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Neill et al (see, *inter alia*, col. 3, lines 49-55).

3. Claims 13-27 are objected to as independent claims 13 and 21 recite "outside the near-site structure" without any prior mention in the claims of a near-site structure. Correction is required.

4. Claims 15-17, 20 and 22-27 are objected to as depending from rejected claims, and may be deemed allowable if made self contained.

5. References B-D (PTO-892) are cited to show the prior art knowledge of spacing geophones closer together to provide finer resolution (Monk et al), hydrophone transducers spaced at .67 meters for off-shore prospecting (Ruehle), and .8 meter geophone spacing (Cannelli et al). The references cited by applicant have been considered and found to be generally representative of the state of this art.
